Title: The Satyagraha Standard: 5 AEIA PromptCasts for Ethical Leadership

Format: Digital PDF

Price: \$49

The Problem:

You want to use AI to scale your impact, but you are afraid of the risks.

- **"What if it writes something culturally insensitive?"**
- **"What if it hallucinates facts?"**
- **"What if it sounds like a robot instead of a human leader?"**

The Solution:

You don't need a better AI model. You need a better Filter.

"The Satyagraha Standard" is a curated set of 5 proprietary "Prompt Architectures" developed over 33 months of Human-Computer Interaction (HCI) research.

These prompts act as a firewall, encouraging the AI to process every request through the lens of Non-Violence, Truth, and Equity before it generates a single word.

What You Get:

Inside this protocol, you will unlock the exact "Copy/Paste" logic I use to serve global NGOs and ethical brands:

- 1. The Polarization De-Escalator: Instantly rewrite heated emails or social posts to bridge divides without compromising your values.**
- 2. The 5D Impact Scanner: A strategic audit tool that checks your projects for Digital, Physical, Social, Economic, and Cultural accessibility.**
- 3. The OctoLingual Bridge: Move beyond "Google Translate" to**

"Transcreation"—ensuring your message resonates emotionally across 8 major language zones.

- 4. The Ph.G Investment Re-Framer: Stop begging for donations. Start pitching "Capitalization Positions" that investors respect.**
- 5. The Truth Audit: A forensic data tool that strips away adjectives and spin, leaving you with only verified facts.**

Who This Is For:

- NGO Directors who need to draft sensitive communications fast.**
- B-Corp Founders pitching to investors who care about ESG and DEI.**
- PeacePreneurs building the "Peace Economy" who need their tech to align with their soul.**

Stop guessing. Start leading with Authenticated Ethical Intelligence.
